## It's All About Germ Protection

[www.ovationscience.com](http://www.ovationscience.com)

[www.dermsafe.com](http://www.dermsafe.com)

## GETS BETWEEN YOU AND GERMS

### How DermSafe Protects:

- ◆ Kills 99.9% of harmful germs
- ◆ **Alcohol-free** hand sanitizing lotion, that won't dry out your hands
- ◆ It's an added level of defense which forms an invisible polymer glove on your hands
- ◆ Proven protection from chlorhexidine gluconate (CHG); an ingredient safely used in hospitals worldwide for over 60 years
- ◆ CHG is known for its ability to bind and stay on the skin<sup>1</sup> and its ability to kill gram-negative and gram-positive bacteria and viruses<sup>2</sup>
- ◆ Made without alcohol, dyes, fragrances or parabens

### How Can DermSafe Protect You?

- ◆ Helps prevent cross-contamination of germs between people and from contact with hard surfaces
- ◆ Prevents the spread of germs in work environments and in public areas
- ◆ Provides protection even when employees do not follow hand washing protocols
- ◆ Protecting employees reduces sick time
- ◆ Great for sport teams and schools

### Why "No Alcohol" Is Important

Alcohol can present numerous challenges to the skin including excessive drying and breaking down the epidermis (the outer protective layer of skin). Alcohol poisoning (from drinking) and its flammability can also present issues.

Additionally, the effectiveness of alcohol is only instant as once the alcohol dissipates (when the smell is gone), it is no longer protecting.

#### DID YOU KNOW?

Most germs come from our hands when we touch our nose, eyes or mouth?

Accepted by Health Canada under "Disinfectants and hand sanitizers accepted under COVID-19 interim measure"

### How to Apply DermSafe

*Just a dime size is all you need*

If dirt is visible, wash and dry hands

Squeeze a dab in palm

Rub in until dry, tackiness goes away in 1 minute

Reapply every 4 hours or as needed
